

Stuttgarter performance+ | DirectPension

# Your high-performance company pension plan.

Flexible design, attractive return opportunities

Together with your employer, you can set up a company pension plan promising attractive returns and a lifelong pension in the form of the DirectPension **performance+**. Part of the contributions saved up will be invested in funds. **Thus, you and your employer will take advantage of the return opportunities offered by the capital markets.**

## Opportunities and security

- Part of your credit balance will be invested in funds. This will create return opportunities. The other part will be invested in the guarantee assets of Stuttgarter, thus ensuring your 80% contribution guarantee.
- The integrated auto-lock-in system will automatically secure your gains once a year. This will additionally increase your guarantee.

## Large selection of funds

- Our range comprises numerous funds which are particularly suitable for retirement provision.
- You yourself can put together your own fund investment from, e.g., theme funds or index funds (ETFs).

## Individual tailoring

- With **performance+** you will stay flexible if your circumstances change.
- You can, for example, increase contributions, suspend payments or top up your contract credit balance with extra payments.
- At the start of retirement, you can decide whether to opt for a lifelong pension, a lump-sum payment or a combination of the two.
